Available: *Onsite, Hybrid, Virtual*

SUMMARY

Recently graduated Full-Stack Engineer with demonstrated expertise in building scalable, production-ready web applications using TypeScript, Java, and modern frameworks. Proven ability to design clean APIs, write maintainable code, and implement robust CI/CD pipelines. Strong collaborator with experience in Agile/Scrum environments.

SKILLS

Languages & Frameworks: TypeScript • Java • React • Angular

Backend & APIs: RESTful APIs • NestJS • Spring Boot • Node.js • API Design • GraphQL • ASP.NET • ExpressJS

Databases: MongoDB • MySQL • Data modeling • Query optimization

DevOps & CI/CD: GitHub Actions • Git • Docker • Jenkins • AZURE

AI Tools: Claude Code • GitHub Copilot • Microsoft Azure AI Foundry • LLaMA • ChatBot

UX/UI Design: Figma • User Research • Design Thinking

Testing & Code Quality: Unit Testing • Integration Test • Mockito • SonarQube • Prometheus • Grafana

Development Practices: Agile/Scrum • Problem-solving • Technical Documentation • Responsive UI Design

INTERNSHIP EXPERIENCE

Software Engineer Developer Intern (Final Year Project)

TSE Consultant INT • Tunis, Tunisia • May 2025 – November 2025 • Hybrid

XPLANB – Full-Stack Collaboration Platform

- Designed and developed a full-stack TypeScript application enabling real-time document collaboration, featuring WebSocket-based live sync, AI-powered assistance (LLaMA 3.1), and integrated video conferencing
- Built scalable RESTful APIs using NestJS, MongoDB, JWT authentication, and Socket.io for realtime features with emphasis on clean code architecture
- Developed responsive, maintainable frontend using React, TypeScript, Vite, and Tailwind CSS with proper component design and state management
- Established automated CI/CD pipeline using GitHub Actions for continuous integration and deployment with automated testing
- Worked in Agile/Scrum environment across 6 sprints with structured backlog management and iterative development

Full Stack Development Engineer Intern

IPACT Consult Inc. • Montreal, QC, Canada • June 2024 – September 2024 • Remote

- Developed full-featured operational dashboards for parking and facility management with role-based access control
- Built RESTful APIs and backend services using Spring Boot with clean architecture principles
- Integrated responsive HTML/CSS templates into Angular frontend with focus on user experience and accessibility
- Implemented 50+ hours of functional features including parking lot management, space allocation, and violation tracking
- Wrote unit and integration tests using JUnit5 and Mockito; participated in code review process
- Collaborated effectively in Scrum environment (4 sprints) with Product Owner and team members

Web Development Intern

Ecole Supérieure Privée d'Ingénierie et de Technologies • El Ghazala, Tunis, Tunisia • July 2023 – August 2023 (2 months) • Remote

- Developed a platform for managing professional job offers (internships and employment)
- Demonstrated great rigor and enthusiasm
- Worked on complex web development projects

Final Year Project Intern / Software Developer Intern

Goodwill Consulting • Cyber Parc, P6J4+J24, Béja, Tunisie • February 2021 – June 2021 (5 months) • Onsite

- Designed and developed a time management web application to help companies track and manage employee working hours efficiently :
- Implemented secure user authentication and access control to protect system functionalities
- Built a real-time notification system enabling HR managers to monitor employee activity
- Developed a comprehensive dashboard for tracking employee working hours and performance
- Generated statistical reports to identify productivity trends
- Followed Agile/Scrum methodology, contributing to iterative development, sprint planning, and timely delivery
- reported progress to the project supervisor

Web Development Intern

Boîte de Développement et Services Informatiques (BDSI) • Bureau N°12 Cyber Park, Béja Tunisie, Beja 9000, Tunisie • January 2020 – February 2020 (2 months) • Remote

- Designed and developed a full-stack web application for a driving school management system by gathering and analyzing business requirements.
- Built a responsive frontend using Angular and implemented RESTful APIs and backend services with Node.js.
- Developed core features such as user management, scheduling, and data handling, while collaborating with team members to ensure overall functionality and usability.

Trainee

Société Tunisienne de l'Electricité et du Gaz (STEG) • January 2019 – February 2019 • Onsite

EDUCATION

Bachelor of Science in Computer Science

ESPRIT (Ecole Supérieure Privée d'Ingénierie et de Technologies)

Graduated: December 2025 • With Honors

B.Sc. in IT, specializing in Information Systems Development

Higher Institute of Technological Studies of Beja

Graduated: June 2021 • With Honors
